Crowded - definitions

Packed, congested, crushed, cramped, overcrowded, full, filled to capacity, full to bursting, overfull, overflowing, teeming, swarming, thronged, populous, overpopulated, over-peopled, busy, mobbed, stuffed, jam-packed, chock-a-block, chock-full, bursting at the seams, bulging at the seams, full to the gunwales, wall-to-wall, like Piccadilly Circus, chocker.

Different people use different words to describe crowded spaces

Highly subjective and emotive. For example, crushed could mean imminent death is likely

Described as a “packed” High Street

Described as a “filled” High Street

Crowd density versus crowd flow rate

Glastonbury 175,000 people (3,626,000 m²)

Woodstock 400,000 people (2,400,000 m²)

View of 400,000 people - Woodstock (1969)

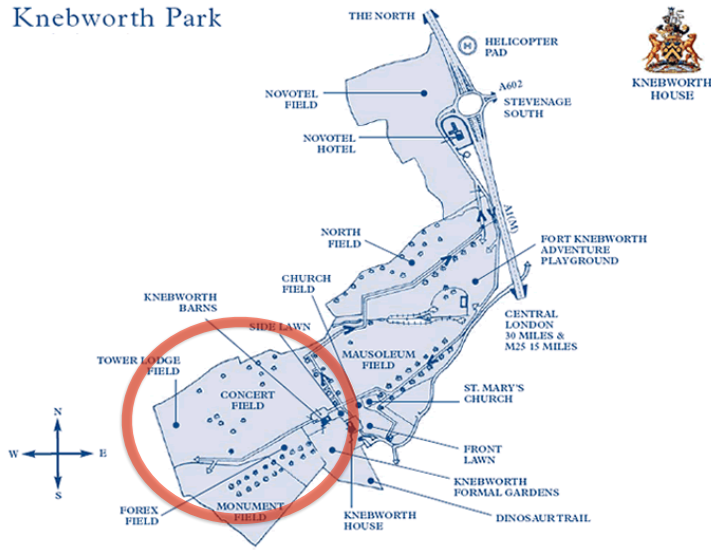

Concert field 35 acres (141,640 m²)

Dimensions

- CHURCH FIELD – 12 acres**
In front of the house and beside the church.
- CONCERT FIELD – 35 acres**
Large space in front of the Hurns.
- FOREX FIELD – 35 acres**
Ideal for activities.
- FRONT LAWN – 6 acres**
Prestigious location for family fun days, small concerts and traditional activities such as archery.
- MAUSOLEUM FIELD – 35 acres**
Field on a slope.
- MONUMENT FIELD – 35 acres**
Large trees lined private area. View of the house.
- NORTH FIELD – 35 acres**
Private fenced area, ideal for flat driving with great view of the House.
- NOVOTEL FIELD – 51 acres**
Direct access from AIM. Ideal for overflow car parking.
- SIDE LAWN – 1 acre**
Situated to the side of the House. Ideal for marquee hire.
- TOWER LODGE FIELD – 35 acres**
Ideal for off road activities.

No fireworks, paintballing or tank driving are permitted on the estate.

Counting crowds at the inauguration (2017)

Prof. Dr. G. Keith Still FIMA FICPEM SFIIRSM MEWI FIPM
 Capt. Marcel Altenburg MA PGCert

The Washington Post

Ignoring safety, what's the maximum number of people that can fit in Times Square?

31st Dec 2016

By Philip Bump December 31, 2016

The New York Times

From Lincoln to Obama, How Crowds at the Capitol Have Been Counted

By TIM WALLACE JAN. 18, 2017

© Manchester Metropolitan University. All rights reserved

“Can you guys do this LIVE?”

© Manchester Metropolitan University. All rights reserved

Common open event questions (RAMP)

We don't know how many people may come to the event...

...what is the best way to plan for a major event?

What direction will crowds approach and depart the area?

Route question (transportation hubs to and from event site)

What is your event capacity?

How much area do you have? How will the area be used?

How quickly will these spaces fill?

What crowd movements do we expect?

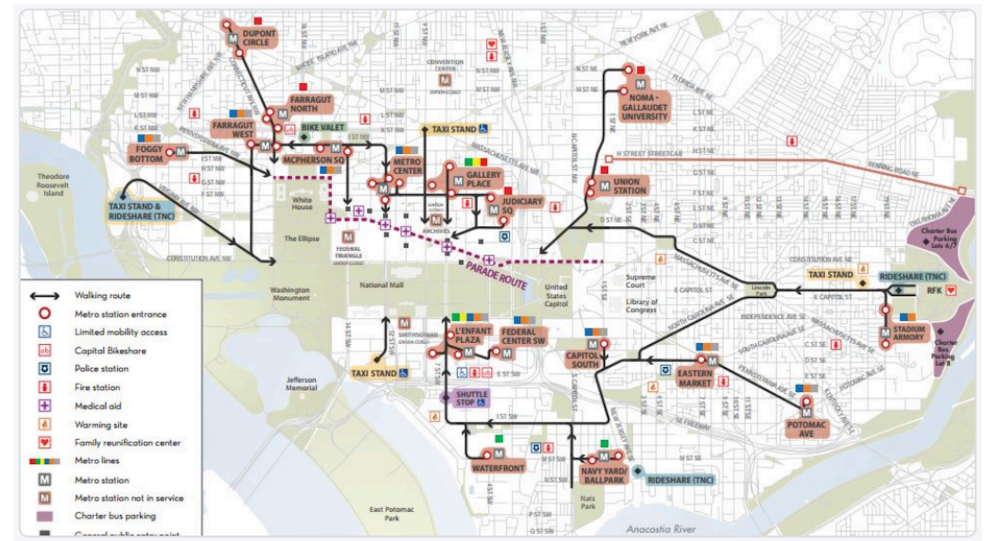

Over what period of time?

What type of crowd are we expecting?

Demographics, families?

© Manchester Metropolitan University. All rights reserved

Routes for the inauguration 2017

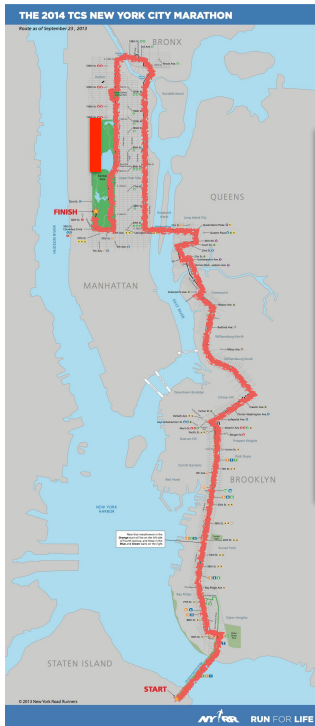

© Manchester Metropolitan University. All rights reserved

Area for the inauguration 2017

What areas do we have available?

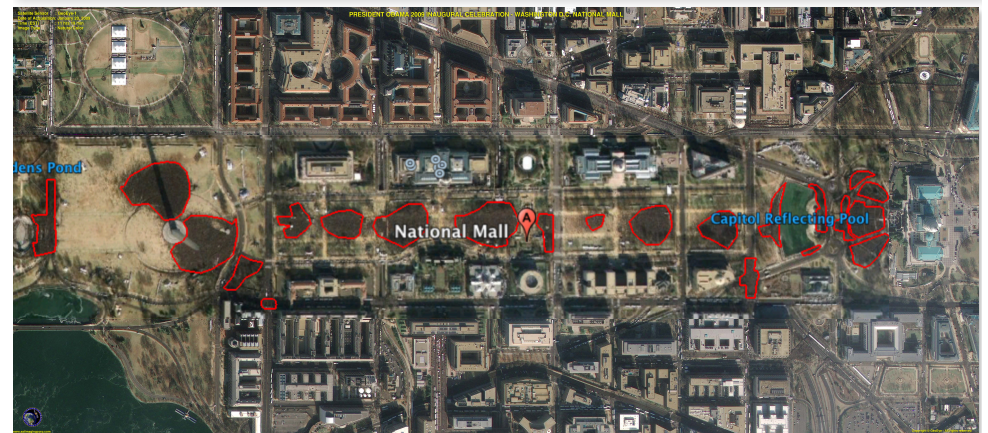

New York Marathon 42.195km

Obama = 1.8 Million

Let's evaluate 42 km x 2 sides = 84,000m
x 2 (people per metre) = 168,000 people
x 11 deep (both sides) = 1,848,000 people

Obama (2009) 175,000m² occupied space

Estimated 1.8 million people (would require 720,000 square metres)

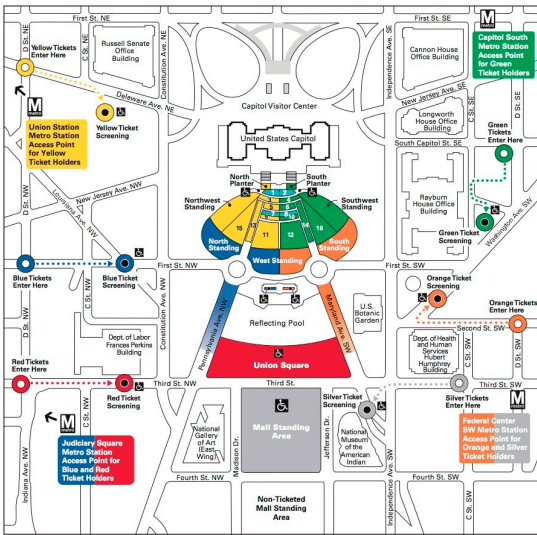

Obama 2009 = 175,000 m² so 400,000 - 500,000 people (@ 2.5 pm²)

Inauguration Ceremonies

MAP AND GUIDELINES
January 20, 2017

The Capital of the United States of America
City of Washington

MAP OF GATE LOCATIONS AND GUEST SECTIONS FOR TICKET HOLDERS
Please bring this Map and Guidelines and your ticket to the Inauguration

From the White House website we had the area allocations

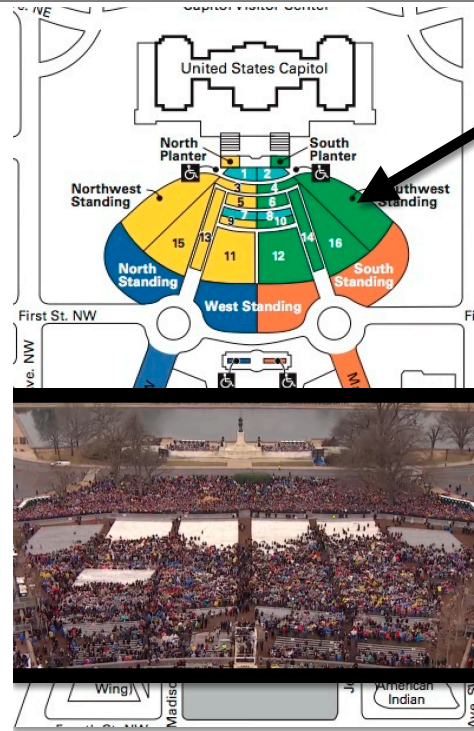

We can map these areas using Google Earth Pro

Measure the space
Evaluate the capacity
Evaluate the routes
Evaluate the transport and parking capacity

Then monitor the crowd build up on the day
How the space is filling over time

Crowd Dynamics

© Manchester Metropolitan University. All rights reserved

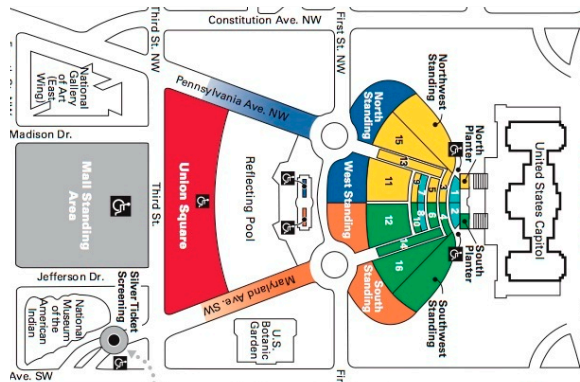

Bowl = 39,346 m²
-10% for spaces

35,000 m² of seating
All seated 2 people per square metres
70,000 people (approx)

© Manchester Metropolitan University. All rights reserved

Penn Avenue = 7,300m²
Union Square = 20,000m²
Maryland Ave. = 5,300m²
Mall Standing = 33,200m²
Total area = 65,800m²
At 2pm² = 131,600
At 3pm² = 197,400

The Bowl
70,000 people

Between 200,000 and 267,400 people

If 100% occupied space
250,000 tickets

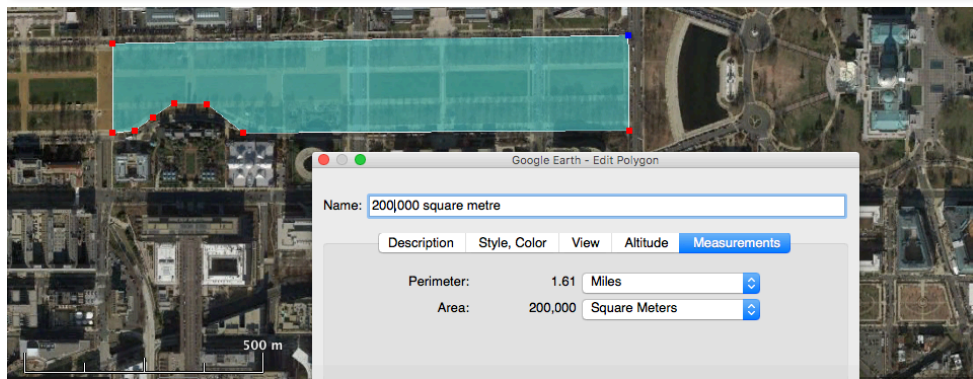

© Manchester Metropolitan University. All rights reserved

We can see the white flooring (used in 2013) is not over the whole area

© Manchester Metropolitan University. All rights reserved

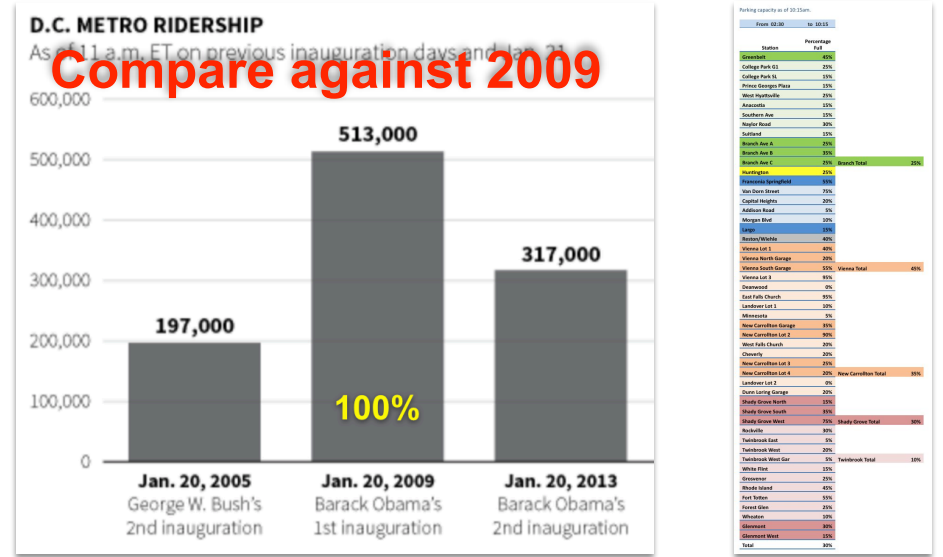

The Mall area was smaller 200,000 m²

It could hold 500,000 people (@ 2.5 pm²)
If fully occupied

For safety, the sections are divided
Barriers and the media tent

Movement (metro and parking - live)

Metro Retweeted

U.S. Secret Service @SecretService · Jan 20

Currently the best access to #inaug2017 is from 7th and Indiana Street and 14th and E Street.

Stay flexible, patient and safe.

23 237 303

Time lapse of the 2017 inauguration

Large empty areas

Measuring the satellite images

From the 2009 satellite images we can measure the high density areas

The front 1/3rd (beyond the reflecting pool) was full in both events

The back 2/3rd's were empty for 2017

The high density areas were 1/3rd of 2009

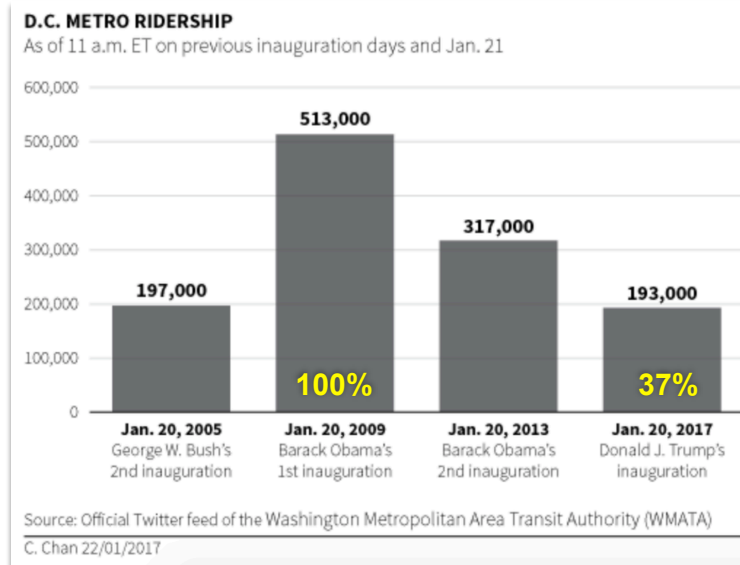

The New York Times published the article, using the above graphics

We had confirmation in the visuals, the area analysis, the crowd build up over time and the metro data.

All point to 1/3rd the Obama crowd

At 11am 193,000 trips (2017)

**IF YOU FIND YOURSELF
IN A HOLE,
THE FIRST THING TO DO
IS STOP DIGGING.**
- WILL ROGERS

"The press was trying to make it seem like we were ignoring the facts ... you look at a situation ... in the same way you can look at a weather report," Mr Spicer said.

"One weather report comes out and says it's going to be cloudy and the next one says there's going to be light rain. No one lied to you."

We may disagree with the weather forecast for tomorrow, but not with the weather we had yesterday!
