Impaired Cerebrovascular Reactivity in Patients With Atrial Fibrillation

J Am Coll Cardiol 2019;73:1230-2.

In the following sentence, the $MCAv_{mean}$ values for AF patients who were fibrillating was incorrect.

AF patients who were fibrillating when studied (55% of total) had a lower $MCAv_{mean}$ ($31.1 \pm 8.7 \text{ cm} \cdot \text{s}^{-1}$) than those not fibrillating ($59.2 \pm 10.5 \text{ cm} \cdot \text{s}^{-1}$) ($p < 0.001$).

The $MCAv_{mean}$ values for AF patients who were fibrillating should have been $44.4 \pm 10.9 \text{ cm} \cdot \text{s}^{-1}$. The correct sentence is as follows.

AF patients who were fibrillating when studied (55% of total) had a lower $MCAv_{mean}$ ($44.4 \pm 10.9 \text{ cm} \cdot \text{s}^{-1}$) than those not fibrillating ($59.2 \pm 10.5 \text{ cm} \cdot \text{s}^{-1}$) ($p < 0.001$).

The authors apologize for this error.

The online version of the article has been corrected to reflect these changes.
