Impaired Cerebrovascular Reactivity in Patients With Atrial Fibrillation

In the following sentence, the MCA\textsubscript{vmean} values for AF patients who were fibrillating was incorrect.

AF patients who were fibrillating when studied (55% of total) had a lower MCA\textsubscript{vmean} (31.1 ± 8.7 cm \text{s}^{-1}) than those not fibrillating (59.2 ± 10.5 cm \text{s}^{-1}) (\(p < 0.001\)).

The MCA\textsubscript{vmean} values for AF patients who were fibrillating should have been 44.4 ± 10.9 cm \text{s}^{-1}. The correct sentence is as follows.

AF patients who were fibrillating when studied (55% of total) had a lower MCA\textsubscript{vmean} (44.4 ± 10.9 cm \text{s}^{-1}) than those not fibrillating (59.2 ± 10.5 cm \text{s}^{-1}) (\(p < 0.001\)).

The authors apologize for this error.

The online version of the article has been corrected to reflect these changes.
